the installation will complete and will be in the 1st phase for 7 days, after which it will go to the 2nd phase that will be repeated in 14 days that will take the serial key to be activated, After that the v23 can be activated for as long as it remains on the product key. Baidu Baike Translation: How do I fix a problem of Windows 10. There's a problem with the registry. I click on the "Edit settings" button and I see that the panel "Display" is empty. I right click on the "Display" and click on "Configure". The system asks me to do a "system restore" and the computer is the same, the system icon is blue and it says "Windows is offline". I click on the "Restore" button, the system will begin to restore. It takes a long time to restart and at the end I see that it failed to restore (no entry). I try to start the system, I cannot. I right click on the "Display" and click on "Configuration". I see that the panel "Display" is empty. I right click on the "Display" and click on "Configure". The system asks me to do a "system restore" and the computer is the same, the system icon is blue and it says "Windows is offline". I click on the "Restore" button, the system will begin to restore. It takes a long time to restart and at the end I see that it failed to restore (no entry). I try to start the system, I cannot. I right click on the "Display" and click on "Configuration". I see that the panel "Display" is empty. I right click on the "Display" and click on "Configure". The system asks me to do a "system restore" and the computer is the same, the system icon is blue and it says "Windows is offline". I try to start the system, I cannot.
