RTSes always have to be wary of plodding too much, and avoid getting into repetitive tugs of war in every match. Well, this game plods right past the idea of not plodding. Aside from the Steam Machine, which was pretty fun and reminded me of how great tanks and ambulances are in C&C games, the Dwarven side at least is mostly just about spamming riflemen and supplementing your mob with too few siege units.

The bases in this game are terrible. They take far too long to destroy, making it hard to make a sudden comeback when things swing in your favor, and making it take forever to lose when you're going to. In several of the maps, they're positioned in the corners, rendering attacks other than full frontal assault impossible.

The RPG mode was definitely not integrated into the game well. RTS players have scrunched up bases and rolling masses of warriors, not the sort of opponent that designers would use if they were making a pure RPG game at all. In terms of feel, it consists mostly of running backwards and shooting, rather than like Diablo, where you blitzkrieg through enemies, moving ever forward while constantly placing your cookie cutters for maximum damage, or like controlling a C&C commando, where every click could either send them to their death or destroy an opponent's structure.. Great Game!.

<https://steamcommunity.com/app/517810/discussions/0/350540973996957919/?l=portuguese>. A really interesting gameplay mechanic is employed in this game:

Your ship can not fly, but only glide. You must use the environment to travel & complete the level/puzzle.

Can get incredibly hard, but overall the game is excellent.. I really love the energy of this game; the characters and enemies are really lively and the cutscenes mad me chuckle a few times. It's really fun to customize and experiment with your formation to suit your play style. Can be hard, but adjustable difficulty makes up for that. Very much recommend.. This series has great worldbuilding and a really fun storyline.. Very great game so many hours to use up in it and over 236 achievements the game reminds me of many elements from the original Final Fantasy such as creating everyone in your party and then farming gold for equipment and skills would play several playthroughs of this game many times cause i love the style of the game if you like old school classic JRPGS give this a try now. A stunning remake of a great strategy game. Eclipsed only by it's successor, XCOM reignited the turn-based tactics genre almost singlehandedly. Worth playing, no matter a sale or not.. Atari should have died back in the 80s.. I love the concept of the game, unfortunately nothing has been done with it in a long time. I would not recommend this game now or ever.

I played this game for a little while and got bored. Not much too it.. A bit too glitchy.

I wanted to love this game so bad because the overall vibe is beautiful and the exploration mechanic feels really nice... when it's working properly.

I got stuck in-between so much terrain and it wouldn't allow me spawn platforms in areas wherein there are no visible objects obstructing it from forming.

Really cool looking game. Unfortunately the bugs are too frustrating to deal with, thus I cannot recommend.. I love this app, I mean sure, it's got a few bugs, like it crashes and I go on the internet to get a picture then open file explorer while the the internet is open, but other than that, it is a great app, I would like to make my own Pokémon cards using this app, I will never stop using it, it's an app that will help make cards in a snap, would recommend to a friend, 5/5!!!. **THIS GAME SUCKS. BOUGHT IT FOR A REALLY CHEAP PRICE BUT IT'S STILL NOT WORTH IT COMPLETE WASTE OF MONEY. REALLY SUCKS..** My review and suggestion is solely based on this game advertised as a single player game. As a multiplayer game, I would rate it very differently. But since its advertised as a single player game, and that is why I bought it, that is how I'm scoring it.

The tricks and power ups are very similar to mario kart. They allow you to boost your game and weaken your enemies. This is great when playing against friends who will struggle with the same mouse controls that you have. But, when playing against AI, it just plain sucks. The computer is not phased by the tricks you throw at it while you get blown out when the AI uses tricks against you. You can throw tricks against it frame after frame and it will still bowl 200+ games. But the super sensitive mouse controls will have you struggling even without the AI's interference. The AI also seems to luck into the tricks much more frequently which seems to be how they scale difficulty as you advance in single player, making an already frustrating game unbeatable.

Its a cute and gimmicky concept, but when you want to advance the single player functionality, its frustrating, buggy, and eventually very boring.

The game is lacking simply options like difficulty sliders, options to skip animations automatically, and how tricks/powerups should work.

Its all about the money. If you find this in a bundle, its worth a small distraction. However, I would not recommend paying full price, or even buying it alone as its replay appeal is very brief and its single player implementation is very poor. As I stated above, if you are playing against other human characters, this might be a very fun game (please keep that in mind when reading reviews).
